

ClearWay Industries, LLC

Custom Designed
Right of Way
Management Solutions

Get the job done.

Custom equipment designed to provide you with tools to get the job done.

Safely. Efficiently.

Tilt

Upperstructure and cab are designed for lateral tilt to either side up to 40 degrees without the use of outriggers.

Boom

Boom extends out to 75 feet to trim the tallest trees. Fiberglass composite boom construction. Boom is electrically insulated to provide additional protection for utility line clearance safety.

Cab

Hydraulic Controls and Boom operated from within Cab. Cab and boom can swing 360 degrees. Full length shatterproof material for operator safety and protection.

Tested and engineered to provide the safest, most efficient right of way clearance services.
